\& Nursery

## Aims of the Session:

- To help you to help your child at home
- Show how maths strategies develop across key stage 1
- Share useful resources and websites

The National Curriculum (Sept 2014) states: "Mathematics is a creative and highly inter-connected discipline that has been developed over centuries, providing the solution to some of history's most intriguing problems. It is essential to everyday life, critical to science, technology and engineering, and necessary for financial literacy and most forms of employment. A highquality mathematics education therefore provides a foundation for understanding the world, the ability to reason mathematically, an appreciation of the beauty and power of mathematics, and a sense of enjoyment and curiosity about the subject." \& Nursery

## How would you solve these calculations?

$$

& 6+ \\
& 15+11= \\
& 24+9 \\
& 32+21= \\
& 45+36= \\
& 120+11=
\end{aligned}
$$ \& Nursery

## How would you solve these calculations?

$2+5=\quad$ (start with the larger number \& count on)
$2+8=\quad$ (number bonds to 10)
$7+7=\quad$ (doubling)
$6+7=\quad$ (near doubles; double 6, then add 1 more)
$15+11=\quad$ (add 10, add 1 )
$24+9=\quad$ (add 10, subtract 1)
$32+21=\quad$ (could add 20, add 1 or add tens, add units/ones and then total)
$45+36=\quad$ (adding by partitioning)
$120+11=($ add 10, add 1$)$

What do we teach in KS1 Maths?
*Number bonds to and within 10 and 20 (ie 7+3=10, 18+2= 20)
*Basic multiplication (2,3,5, 10)
*Basic division (2)
Fractions ( $1 / 2,1 / 4,1 / 3$ )
*Addition and subtraction to 100
*Place value (units/ones, tens and hundreds)
Time (o'clock, half past, quarter to, quarter past)
Measurement (weight, length, capacity)
Money (everyday money- calculating change)
*Problem solving
Handling data (graphs, tables, sorting data)
Shape and space
Today we will focus on the underlined examples

## Key Stage 1 - Practice makes Permanent

- The principal focus of mathematics teaching in key stage 1 is to ensure that pupils develop confidence and mental fluency with whole numbers, counting and place value.
- This should involve working with numerals, words and the four operations, including with practical resources (for example, concrete objects and measuring tools).
- An emphasis on practice at this early stage will aid fluency.

## Multiplication

(Drawing and using arrays)

$3+3+3=9$
3 "lots of" 3 = 9
$3 \times 3=9$
$5+5+5=15$
3 "lots of" $5=15$
$3 \times 5=15$

## Multiplication

(Mental recall)

$$
\begin{aligned}
& 1 \times 2=2 \\
& 2 \times 2=4 \\
& 3 \times 2=6 \\
& 4 \times 2=8 \\
& 5 \times 2=10 \\
& 6 \times 2=12 \\
& 7 \times 2=14 \\
& 8 \times 2=16 \\
& 9 \times 2=18 \\
& 10 \times 2=20
\end{aligned}
$$

Once the children can count confidently in 2 s , 5 s and 10s then we begin teaching multiplication. If children can count $2,4,6$,
8, 10, 12... then they can
work out $6 \times 2$ !
Start by using the phrase...
what is 6 'lots of' 2 ?
Move on to...
What is 6 'times' 2?

| I am going to count on from 8 | No, you will say 9 and <br> 10. If you were <br> counting backwards <br> you would say the <br> number 6 |
| :--- | :--- |
| Will I say the number 6? | Explain your answer. |
| Jo has counted the toy cars and said: |  |

> How many ways can you represent 6 glasses of apple juice?
> How many ways can you show me less than 4 sweets?
> How can you show me that there are more green cars than blue cars?

Children could line up 6 counters, cubes Children could line up 3, 2, 1 or get zero counters Children could get 1 blue cube and 2 green cubes etc. \& Nursery
